问题	❌ 原始基座模型
Question: James sold cars to 24 people in January, and then he sold one third as many cars in February. How many cars did James sell altogether in January and February?	24 cars. Explanation: 24 people * 12 cars = 288 cars. 1/3 of 288 cars = 96 cars. 24 people * 12 cars + 96 cars = 34
	✅ 后训练微调后的模型
	24 + 8 = 32. The answer is 32.
